

VACUUM-FORMED TRUNK LINERS AND FLOOR MATS

Carbox - a brand for car accessories

Since 1908 Carbox has provided preferably the automotive market with innovations and high quality products.

Carbox develops and produces car accessories, particularly trunk liners, in large quantities for car manufacturers and also in small batches for the after market sector, mostly in Europe.

In addition to OEMs and individual car owners, typical customers are builders of special vehicles and companies with fleets of service vehicles.

Individual production in detail

Serial production for OEMs (Vacuum-forming)

Quality control of each shipment

All products are internally developed (incl mould manufacture)

Trunk liners for over 1,000 different models of vehicles

All Carbox products are made by materials that are 100 % recyclable.

The products are sustainable and supplied with a 10-year warranty and manufactured in accordance to the latest environmental regulations. New BIO-materials are continuously being scrutinized and gradually introduced into the product range.

Carbox has recently upgraded its mould capability and holds now state-of-the-art milling capacity in this area. Moreover Carbox has since long up-to-date vacuum-forming facilities including adherent processes as milling, gluing, assembly etc.

Floor protection

Carbox Floor for floor protection for driver, front passenger and rear seat passengers.

Carbox Floor Highline for not only floor protection but also for the lower side walls in the compartment.

A range of products for improved protection and comfort:

Carbox Classic – high sided trunk liner

Carbox Form – low sided trunk liner

Carbox MultiMat – protects the loading sill
